

ABSTRACT

An LED chip mounting structure provided by the present invention includes a wiring board with a mounting pad (45R),
5 an LED chip (10) with an electrode (12) facing the mounting pad (45R), a bump (47) disposed between the mounting pad (45R) and the electrode (10) to electrically connect the mounting pad (45R) to the electrode (10), and an adhesive member (7) for fixing the LED chip (10) to the wiring board
10 (41).
